St. Augustine Community College

Summer Classes 2026

Pass Exams! *Improve Grades!*

Attention Parents / Guardians & Students,

Our team of qualified, experienced, dedicated teachers has been put together to provide the top quality education which your children need to supplement what they do at school and to ensure success in CSEC exams and continuous assessments.

During the long school holidays most students tend to lose interest in academic pursuits and this is reflected in their performance during the following term. Many young people become bored, idle and restless.

Our goal is to secure the students' interest in their studies and thus assist them in achieving success in their examinations by revising work done in the last term and introducing them to selected areas of the syllabus to be covered in the coming terms.
